

Public Hearing
November 29,2023

It is not a change of circumstance to say that other businesses travel north on Darrow Rd., so, Circle T should be able to do so too.

It is not a change of circumstance to say that you want to expand hours of the batch plant so people won't be able to complain about noise coming from the site.

Mr. Simmons said that there isn't going to be an increase in production of cement.

So, what is the change of circumstance that explains why they are asking for a change to the original 23 conditions?

What about the pad being poured at least 2 months ago? Has it been inspected? It wasn't supposed to be poured until the new site plan was approved. This is according to their Site Plan Condition #19. So, already they have violated the site plan?

Please attach this to the record for this Public Hearing.

Thank you,

Mark Williams
