

New Haven Community Tree Fund

You must own land in the Town of New Haven.

5-inch native bareroot stock trees will be ordered from NYS Department of Environmental Conservation.

You can order one tree per parcel of land owned in the town.

You may choose up to three types of trees – if your first choice is not available, we will order your next choice.

If only one type of tree is desired, you may choose only one, but may have to wait until it is available to be ordered.

As orders come in, the choices will be used to determine what type of tree is ordered for each, based on what is available at the time of ordering.

Orders will be placed depending on availability.

Orders will be ongoing, depending on availability, if funds are still available.

The first order will be placed in January 2024, the deadline for this order is November 15, 2023.

Funding donated by US Light Energy
